# The flexible, invisible and integrated speaker system

Pop-up speaker is the system for creating a sound environment that opens up new positioning possibilities for speakers, making them effectively invisible when not in use.

Pop-up speaker is customizable both in materials and colors, and blends in seamlessly with any interior design solution, removing the need for exposed, fixed speakers or cables that spoil the appearance and decor of an environment.
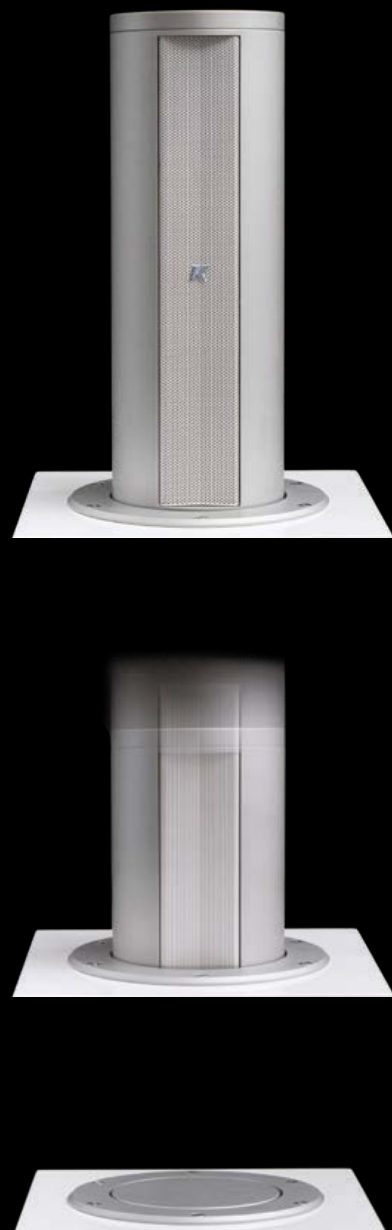

Pop-up speaker is ideal for outdoor environments like swimming pool areas or the external decks of yachts thanks to its waterproof technology and also adapts to open space interiors, with a clean, minimal style.

Pop-up speaker is equipped with passive K-array speakers powered at low voltage and features a closing mechanism made by AMS Advanced Mechanical Solutions to ensure that the product opens and closes silently.

→ **Weight**
30 kg (66.1 lb)

→ **Power supply**
24V DC

sound silence

Pop_up speaker features

→ **Anodized aluminum** for maximum corrosion resistance and durability

→ **Sleek design** for maximum safety during handling **(1)**

→ **Built-in end-strokes** for fully closed and open positions

→ **Noiseless internal IP69K actuator**

→ **Watertight system** in completely closed and open positions **(1-2)**

→ **Solid and robust system without vibrations,** ideal support for the speaker

→ Possibility to install a **drainage** on the bottom

→ **Unified Speakon®** connector for audio cable and 24VDC power supply (single cable)

→ **Customizable connector orientation** around the case **(3-4)**

→ **Material, finishing and color customizable** on request

→ **Dimensions**
